HOME
EMBROIDERY
made Easy

Perito Modulo is the amazing new embroidery software that allows you to load and save designs from a full range of domestic formats and then manipulate them in a wide variety of ways. Take control of your designs!

- Easy to use Quick Text feature - 10 fonts **included**
- Foreign character support
- Scale designs to any size and maintain stitch quality
- Merge whole designs/parts of designs together
- Thread Palette containing all major domestic thread charts
- Mirror and rotate designs/stitch blocks
- Store & organise designs in the integrated database
- Full range of design viewing tools
- Print design information sheets
- Comprehensive integrated help & email support

QUICK TEXT

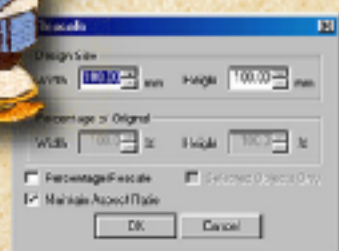

**Loads & Saves all
the following formats:**

PES, PEC - Brother
JEF, SEW - Janome
HUS - Husqvarna
DST, XXX, TAP
KSM, EXP

Perito Modulo also connects directly to the world renowned **PES2Card Reader/Writer**.

Load designs straight from your embroidery card into **Perito Modulo** and start working with them immediately. Change the size, add text, even merge designs together - it's up to you.

And when your design is ready just save it direct to the appropriate card.
